

Let's Make This About Learning...

Learning Through Technology Team - Spring 2015

When you go to the hardware store to buy a drill bit, you
don't really want a drill bit.
You want a hole.
Dr. Ralph Granger - UMF

The true value of technology lies
not in learning to use the technology,
but in using the technology to learn.

Given education is a \$600 billion a year industry, are we
investing that money well enough
to insure that students are
mentally and physically present and engaged?
<http://goo.gl/ehSlj5>

Let's not talk about technology
without also talking about **content**
and pedagogy. Let's talk about how
we want to use technology to
improve learning, and what
professional knowledge we would
like our educators to have.

Thinking about building the capacity of
educators:

Let's include in our conversation how effective use of
technology provides ongoing opportunities for improved
student **engagement and motivation**.

Thinking about motivating students - <http://mcmel.org/motivation/>
